State of Montana – Department of Labor and Industry - # 1075

Clinical Experience and Specialty Areas

I have had the opportunity to work in a private practice setting for the past 11 years and also have experience in the school setting and long-term care. I enjoy the opportunity I have in this type of setting to work one on one with children and families. *Pediatric Speech Therapy Solutions* was established in 2011 to fulfill my vision of working with a team of professionals to provide coordinated therapy services. I am passionate about the importance of early intervention both in the birth to three population, as well as in children diagnosed with autism spectrum disorder. In addition to my training as a speech-language pathologist, I have spent the past five years receiving training in DIR Floortime and am currently an advanced provider. This training promotes a developmental and relationship-based approach that I am able to incorporate into my therapy sessions.

Hobbies and Personal Interests

I am married and have two children. Our family enjoys skiing, hiking, camping, and spending time at the lake. My hobbies have evolved over the past few years to include lots of time on the sidelines watching hockey, baseball, football, swimming, and any other activity my children decide to join.

Philosophy of Care

To provide dynamic, child-directed therapy while also working with families to support their child at home.
